22. Answer Yes or No: Is it O.K. to bend or break sharps? _____

23. Answer Yes or No: If laundry is only soiled with body fluids but not blood you do you have to take any special precautions?

When an exposure incident occurs three steps must be taken. Put check marks by the three correct answers.

- _____ Cleanse the area of exposure to minimize the chance of infection.
- _____ Tell your co-workers you think you just caught HIV.
- _____ Tell your direct supervisor to begin documenting what happened.
- _____ Just keep working and see if you start to feel sick in a few days.
- _____ Seek medical treatment and evaluation.
- _____ Don't do anything it's not a big deal.

This is to verify that I have reviewed my employers Hazard Communication and Bloodborne Pathogens Workplace Training Packet which explains the written plans to me. I understand the plans, I know where they are kept and I know they are available for my review.

I have completed the training on this date.
